

NPDES PERMIT (NER220006) FOR SMALL MUNICIPAL STORM
SEWER DISCHARGES TO WATERS OF THE STATE LOCATED IN
DOUGLAS, SARPY, AND WASHINGTON COUNTIES OF NEBRASKA

NPDES PERMIT NUMBER NER220006
NDEE ID 999074

2022 ANNUAL REPORT

Submitted by:

Village of Boys Town
355 McBreen Circle
Boys Town, NE 68010

March 31, 2023

Report of Certification

“I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for known violations. See 18 U.S.C. 1001 and 33 U.S.C 1319, and Neb. Rev. Stat. 81-1508 thru 81-1508.02.”

Title

1. BACKGROUND

On July 1, 2017 the Nebraska Department of Environmental Quality (NDEQ) issued a National Pollutant Discharge Elimination System (NPDES) permit NER210000 for Small Municipal Storm Sewer discharges to waters of the state located in Douglas, Sarpy, and Washington Counties of Nebraska. The co-permittees of the Papillion Creek Watershed Partnership (PCWP) currently authorized to discharge municipal storm water under this permit are Bellevue, Boys Town, Gretna, La Vista, Papillion, Ralston and Sarpy County.

The NPDES permit requires that the co-permittees submit by April 1 each year an Annual Report documenting the status of all the general programs and individual tasks contained in the Storm Water Management Plan (SWMP). This document is being submitted by Boys Town to meet that requirement and covers the period from January 1-December 31, 2022.

2. COOPERATIVE AGREEMENT

The Partnership entities entered into an interlocal agreement in 2001 and continuation agreements in 2004, 2009, 2014, and 2019 that established a framework for meeting the permit requirements. The 2019 agreement was approved by the following entities Bellevue, Boys Town, La Vista, Papillion, Ralston, Sarpy County, Gretna, the Papio Missouri Natural Resources District and City of Omaha. These agreements identify the lead organization and the participating partners for each SWMP element and establish a basis for cost-sharing to meet the Phase II permit requirements of the permittees. The SWMP for the permit issued in 2017 was approved on June 28, 2018. This report covers the second half of permit year 4 and the first half of permit year 5.

3. PERMITTEE COORDINATION

In 2001, the PCWP began as a planning committee to assist the small MS4 communities in addressing their permit application requirements. The focus of the continuation agreement reached in 2004 was on the implementation of the SWMP as incorporated in the general NPDES permit. The 2009 agreement focused on an overall watershed plan addressing water quality and water quantity for the participating members as well as a renewal of the NPDES permit and implementation of the updated SWMP. The 2019 agreement continues implementation of the watershed plan along with a renewal of the NPDES permit and an updated SWMP. A new permit was effective July 2017 however, the SWMP was not approved until June 28, 2018.

The PCWP has held monthly meetings since August 2001. The meetings help to coordinate activities and identify needs consistent with the goals of the PCWP and implement the NPDES permit SWMP.

4. STORMWATER MANAGEMENT PLAN ACTIVITY SUMMARY

A. Public Education and Outreach

A.1, 3, & 4. Develop a plan for outreach that defines the goals, objectives, target audience, and distribution process of materials for the public education and outreach program. Year 1 – Develop a 5-year education and outreach plan. Submit the plan to NDEQ with the Annual 21573Report. Years 2-5 – Review and update the plan each permit year and include the revised plan in the annual report.

The outreach plan was reviewed and deemed sufficient. No updates were made.

Keep Omaha Beautiful and the City of Omaha Stormwater staff assisted the PCWP with distribution of different types of brochures and educational information and materials throughout 2022. Brochure topics include pollution prevention, good housekeeping, pesticide, fertilizer, and household hazardous waste. They were present at community events and outreach activities where 7,976 brochures distributed on various topics. Brochures and educational information were delivered to commercial and public locations around the area and presentations made to local groups. School events, virtual presentations, and community events provided an opportunity to reach 22,237 attendees. A total of 6,537 items were distributed or downloaded from OmahaStormwater.org and the Keep Omaha Beautiful Website. A list of locations and summary of presentations, both in-person and virtual, are provided in Attachment A-Summary of Outreach Activities for calendar year 2022.

The Village of Boys Town has developed an outreach plan that originates at new employee orientation. Ongoing outreach activities include biannual correspondence regarding lawn fertilizers and treatments by grounds maintenance staff, proper disposal of paint waste products, proper disposal of pet waste, recycling and litter reduction. Village grounds staff maintain annual pesticide licensure. Licensure and certification documents can be found in Attachment H.

This permit requirement has been met.

A.2. Maintain and update appropriate messages for targeted residential, construction, and commercial issues. Year 1 – Inventory current outreach materials in each of these target areas and develop new materials as needed. Years 2-5 – Provide copies of new outreach materials in the annual report.

The City of Omaha Environmental Quality Control Division has developed many outreach materials over the years for use by the PCWP communities. These materials have been inventoried and categorized into the following target areas: residential, construction, commercial, and industrial. An inventory of current outreach materials is provided in Attachment B. No new outreach materials were developed.

The Village of Boys Town has a packet which is distributed to all new employees at the time of orientation. A poster is distributed to all parent/teacher homes in the Village. Annually, the Village Board makes an announcement regarding storm water management. Storm water

education materials are posted on “The Hub” which is the Village’s internal website which targets all employees and residents of the Village.

This permit requirement has been met.

B. Public Participation and Involvement

B.1. Provide opportunities for citizens to comment on new rules, ordinances, and regulations regarding the MS4. On-Going All Years – Post on the Boys Town website proposed changes to rules, ordinances, and regulations. Provide information in the annual report on approved changes and input received from the public.

The Grading Permit Terms and Conditions were updated to be consistent with the Nebraska Department of Environment and Energy Construction Stormwater Permit. These changes were presented at Partnership meetings for community discussion on April 8, 2022 and during the Partnership meeting on August 25, 2022. Meeting minutes, with attendee lists are available at www.papiopartnership.org. A stakeholder meeting was also held on September 22, 2022 to discuss the changes with representatives of the regulated community. A sign-in sheet from that meeting is included in Attachment K.

Boys Town storm water education materials are posted on “The Hub” which is the Village’s internal website which targets all employees and residents of the Village.

This permit requirement has been met.

B.2. Create opportunities for citizens to participate in the implementation of stormwater controls. On-Going All Years – Post on the Papillion Creek Watershed Partnership Website opportunities for public involvement in stormwater control related activities.

The PCWP website, www.papiopartnership.org, includes but is not limited to, the contact information for PCWP representatives (including links to the respective PCWP representative’s websites) and the illegal dumping/illicit discharge report form, PCWP meeting minutes, upcoming meetings and outreach opportunities, PCWP permits, past reports, and studies are also available on-line as well as general information about the PCWP and about watersheds, best management practices, and stormwater management in general. Additional items located on the website are the current PCWP interlocal agreement, watershed management plan, implementation plan, and stormwater policies, all of which were adopted by the PCWP coordinated partners in 2019. A link is also included to the City of Omaha’s stormwater web site, www.omahastormwater.org.

The City of Omaha has developed and deployed a website, www.omahastormwater.org dedicated to the City’s Stormwater Management Program. From the website industries within the PCWP can access the necessary documents to apply for stormwater permits.

Residents can access information from the City of Omaha's website as to how they can improve water quality through actions they take at home. Children's activities are also available on the website. There is public information available on demonstration stormwater best management practices that have been implemented in areas of the city. Additionally, there is an online complaint or comment form available to the public. Attachment C provides the download statistics for the omahastormwater.org website and Omaha Stormwater Facebook Page for 2022. The PCWP held several meetings in 2022, which are open to the public, and the minutes for those meetings are available on the PCWP website at www.papiopartnership.org.

Keep Omaha Beautiful, Inc. (KOB) organized 2022 Litter and Stream Clean ups. There was a total of 267 cleanup efforts near waterways throughout the year. 4,865 volunteers donated 11,084 hours collecting 4,075 bags of litter. In addition to the water courses, parks and trails were also targeted in the cleanup efforts.

KOB also coordinates storm drain marking throughout the Papillion Creek Watershed. KOB continues to utilize a GIS tracking system to better direct the volunteers to areas that do not have storm drains marked. The City of Omaha has approximately 110,000 storm drains, using the GIS system should make tracking those inlets which have been marked or need marking easier to manage. KOB coordinated volunteers throughout 2022 to mark and clean storm sewer inlets. In 2022, 3,154 inlets were marked by 609 volunteers. Inlet marking activities are documented in Attachment I

The World O! Water Festival was held on September 10, 2022 from 1 PM until 4PM at Wehrspann Lake / Chalco Hills Recreation Area. There were 17 other organizations that participated by handing out information, conducting an activity or providing a demonstration. The approximate number of visitors attending World O! Water in 2022 was 280. Information available at the event included water stewardship, recycling, water quality, and water conservation. Activities included a watershed pollution demonstrative model, nature hikes, and science experiments and more. After two years of a virtual event, this event was smaller in scope than before the pandemic. To help prevent further spread of COVID-19, some activities, such as canoe rides, were not available this year. This was the 18th year of World O! Water. A website, <https://www.worldwater.org>, and Facebook page are maintained year round with information regarding the event and educational materials.

Additional data is included in Attachment A – Summary of Outreach Activities.

The Village of Boys Town has an internal facing website which has reporting contact information. The posters placed within the Village residences create awareness and opportunity for education about best storm water management practices. A copy of the poster is shown in Attachment L.

This permit requirement has been met.

B.3. Provide access to information about the Boys Town SWMP. On-Going All Years – Maintain current SWMP and MS4 annual reports on the Papillion Creek Watershed Partnership Website.

The current Stormwater Management Plan and the 2021 Annual Report can be found at www.papiopartnership.org. The 2022 report will be posted to the website in 2023.

The Village of Boys Town’s SWMP and annual reports are available on the internal facing website “The Hub.”

This permit requirement has been met.

C. Illicit Discharge Detection and Elimination

C.1.a. Maintain a compliance plan or mechanism to follow up on illicit discharges. On-Going All Years – Maintain the compliance procedures per the permit requirements.

The City of Omaha’s compliance plan is titled the Omaha Environmental Enforcement Manual. This manual describes the City’s enforcement goals, process and mechanisms, program priorities, enforcement mechanisms and civil penalty policy. The PCWP utilizes this plan to maintain compliance.

In the event Boys Town would need to implement enforcement actions the Omaha Environmental Enforcement Manual would be utilized as a template to maintain compliance.

This permit requirement has been met.

C.1.b. Maintain a map showing all known MS4 outfalls and the location of all state-designated waters receiving direct discharges from MS4 outfalls. On-Going All Years – Maintain a continually updated storm sewer system map per the permit requirements.

Each community in the PCWP sends information to the Douglas or Sarpy County GIS departments where the outfall maps are maintained. The websites for Douglas and Sarpy Counties are <https://www.dogis.org> and <https://maps.sarpy.com/html5viewer/index.html?Viewer=SIMS> respectively.

The Village of Boys Town has a link to it’s internal website for outfall locations.

This permit requirement has been met.

C.1.c. Conduct field screening activities per the permit requirements specifically geared to local TMDL pollutants of concern such as E. Coli. Other parameters will be determined based on the

results of a PCE, but could include nutrients, ammonia, BOD, and TPH. On-Going All Years – Annually conduct dry weather monitoring priority outfalls (those that are 72” or greater and/or those with documented illicit discharges within the previous 3 years).

Dry weather discharges identified, as the outfalls are inspected will be investigated with respect to the source of the discharge. The Physical Characteristics Examination (PCE) will be completed as part of the inspection process and, if there is reason to believe that the discharge is allowable under the stormwater ordinance/regulation, the investigation will be terminated. If the PCE indicates that there may be an illicit connection, a more comprehensive investigation will be undertaken that may involve sampling the discharge, tracing the line upstream to identify potential sources, and questioning potential dischargers. If a potential source is identified, information will be provided regarding the impact to human health and the environment to resolve the problem.

In the event a Sanitary Sewer Overflow has been identified Boys Town will follow the Sanitary Sewer Overflow Reporting Procedure as outlined in Attachment J.

This permit requirement has been met.

C.1.d. Implement procedures to investigate and trace sources of identified illicit discharges to the MS4. On-Going All Years – Document investigations, including date observed, result of investigations, and date closed.

The Village of Boys Town Facilities Maintenance and Operations personnel and Lamp Rynearson respond and investigate inquiries regarding trace sources of identified illicit discharges. No trace sources of illicit discharges were identified in the Village of Boys Town in 2022.

C.1.e. Implement the procedures to remove illicit discharges to the MS4. Document all interactions with potentially responsible parties. On-Going All Years – Use the code enforcement procedures to eliminate unauthorized non-stormwater discharges identified during an investigation.

The Village of Boys Town Facilities Maintenance and Operations personnel implement the procedures regarding the elimination of unauthorized non-storm water discharges. No unauthorized non-storm water discharges were identified in the Village of Boys Town in 2022.

This permit requirement has been met.

C.1.f. Identify and address allowable non-stormwater discharges determined to be significant contributors to pollutants. Identify an additional non-stormwater discharges that will not be addressed as illicit discharges. On-Going All Years – Report on any local controls or conditions placed upon exempt non-stormwater discharges and additional identified exempted non-stormwater discharges.

At Boys Town, there were no non-storm water discharges determined to be a significant contributor to pollutants made in 2022.

The following allowable non-stormwater discharges will not be addressed as illicit discharges:

- a. Discharges from firefighting activities.
- b. Fire hydrant flushings;
- c. Water used to wash vehicles where detergents are not used.
- d. Water used to control dust.
- e. Potable water including uncontaminated water line flushings;
- f. Routine external building wash down that does not use detergents.
- g. Pavement wash water where spills or leaks of toxic or hazardous materials have not occurred (unless all spilled material has been recovered) and where detergents are not used.
- h. Uncontaminated air conditioning or compressor condensate.
- i. Uncontaminated groundwater or spring water.
- j. Foundation or footing drains where flows are not contaminated with process materials such as solvent; and
- k. Landscape irrigation.

C. 2 & 3. Coordinate with adjacent permitted MS4s to report illicit discharges to the appropriate authority having jurisdiction and respond to reports from other MS4s. Year 1 – Develop procedures for coordination with adjacent permitted MS4s. On-Going All Years – Include in the annual report any known illicit discharge reports to and from adjacent MS4s.

The Omaha Stormwater Program operates a hotline, 402-444-3908, and a reporting form at [OmahaStormwater.org](https://www.omahastormwater.org) to receive complaints from the public regarding stormwater issues. These options for reporting complaints and illicit discharges are promoted through the Papillion Creek Watershed. Complaints received by the Omaha Stormwater Program located in adjacent MS4s are forwarded immediately to them for investigating. Complaints received by adjacent MS4s that are in the City of Omaha limits or its Extra Territorial Jurisdiction (ETJ), are immediately forwarded over. A Memorandum of Understanding has been developed to address illicit discharges that occur in extra-territorial jurisdiction areas or that impact more than one jurisdiction.

There were no complaints received by the City of Omaha regarding illicit discharges in adjacent MS4s.

There were no illicit discharges complaints made to the Village of Boys Town in 2022.

This permit requirement has been met.

C.4. Maintain written procedures for the IDDE component of the MS4 permit. On-Going All Years – Make available upon request the standard operating procedures developed under this program component.

Upon request Boys Town will provide a copy of the standard operating procedures developed under this program component.

This permit requirement has been met.

C.5. Receive reports and complaints, internally and from the public, of illicit discharges and illegal dumping into the MS4. Respond to and investigate complaints about spills, dumping, or disposal of materials other than stormwater to the MS4. On-Going All Years – Coordinated with others to resolve complaints. Develop a system to generate reports and track the number of calls per year in regard to spills, dumping, or improper disposal of material to the MS4. Include a count of complaints received and investigation completed in the annual report.

The City of Omaha continues to maintain a phone line, 402-444-3908, for handling stormwater calls. Clerks are available during regular business hours to handle calls for the City and the PCWP member entities. The clerks answering the hotline are required to complete a form when answering the calls so that all the required information is collected. The form is tied to a database that stores all calls received and provide a mechanism for tracking calls. A representative from the City of Omaha will use the information stored in the database to direct the call to the appropriate PCWP representative or their designee.

There were a total of zero (0) complaints received via the Papiio Partnership website (www.papiopartnership.org) or the hotline in 2022 for our jurisdiction. Public complaints on sediment and erosion control can be logged into the erosion website (www.OmahaStormwater.org).

The Village of Boys Town operates a dispatch center. There were no illicit discharges or illegal dumping into the MS4 made in 2022.

This permit requirement has been met.

C.6. Develop, implement and maintain a training program for municipal field staff with respect to IDDE. Year 1 – Develop a strategy which identifies field staff and appropriate levels of training. Years 2-5 – Provide a count of employees which have received training in the annual report.

The Village of Boys Town developed a strategy to train field staff. Brian Sutter was trained in 2022. Additionally, staff are trained in fertilizer and chemical application. Application licenses can be seen in Attachment H.

This permit requirement has been met.

D. Construction Site Runoff Control

D.1. Maintain the established program requiring operators of public or private construction activities to comply with local erosion and sediment control requirements. On-Going All Years – Include any updates to code or permit requirements in the annual report.

The City of Omaha's Environmental Quality Control Division (EQCD) continued to implement the Grading Permit Program for the PCWP in 2022. The Grading Permit Terms and Conditions were updated, effective November 14, 2022. A summary of the changes is in Attachment K.

There are no public or construction activities within the Village of Boys Town for which a Boys Town grading permit was assigned. When construction takes place within the Village of Boys Town, a consultant is engaged to perform routine site inspections to ensure compliance with local erosion and sediment control requirements. No updates have been made to code.

This permit requirement has been met.

D.2. Maintain a compliance plan or mechanism to follow up on construction site non-compliance. On-Going All Years – Maintain the compliance procedures per the permit requirements.

The City of Omaha's compliance plan is titled the Omaha Environmental Enforcement Manual. This manual describes the City's enforcement goals, process and mechanisms, program priorities, enforcement mechanisms and civil penalty policy. No updates were made in 2022. The PCWP uses this plan to maintain compliance.

This permit requirement has been met.

D.3. Review grading permit applications and maintain a continually updated inventory of all private and public construction sites. On-Going All Years – Include in the annual report the number and type of grading permits reviewed.

In 2022, there were 64 Phase I grading permits and 105 Phase 2 grading permits issued in the PCWP communities. A breakdown of grading permits by community is shown in Attachment D.

The Village of Boys Town issued 0 grading permits in 2022.

This permit requirement has been met.

D.4. Maintain the electronic records for inspection of construction sites and enforcement of erosion and sediment control measures. Year 1 – Develop a strategy for site inspections by municipal staff and include in the annual report. On-Going All Years – Inspect construction sites on a regular basis and on a complaint basis. Track the number of sites inspected annually in a database. Initiate enforcement proceedings as appropriate to address violations. Include a summary of inspections completed and enforcement actions taken in the annual report.

The City of Omaha Stormwater Program developed a strategy for site inspections by municipal staff. EQCD administers the inspection program for Erosion Control, both within the City of Omaha’s jurisdiction as well as the Papillion Creek Watershed Partnership’s (PCWP) individual member’s jurisdiction. The City’s Grading Permit Program requires that the owners of active sites assign a Project Inspector to do inspections weekly for Stage 1 sites, every other week and within 24 hours of a storm event of at least 0.25 inches for Stage 2 sites, monthly and within 24 hours of a storm event of at least 0.25 inches for Stage 3 sites and Winter Stage sites. In the 2022 calendar year, reports were submitted to Permix by City Inspectors and Project Inspectors for construction sites as per the NPDES Stormwater Discharges from Construction Sites General Permit.

Violations processed in 2022 are referenced in Attachment D as well as a breakdown of permits and inspection reports by community. The table below summarizes PCWP construction inspections for 2022.

	City Inspection Reports	Private Inspection Reports
Phase I Sites (>5 acres)	1,539	13,660
Phase II Sites (<5 acres)	835	6,713
Total	2,374	20,373

When construction takes place within the Village of Boys Town, Lamp Rynearson is engaged to perform routine site inspections to ensure compliance with local erosion and sediment control requirements.

Lamp Rynearson completed a total of 9 oversight inspections and reporting for the Village of Boys Town Education Center in 2022. Reports are maintained by Lamp Rynearson for a period no less than three years following completion of the project.

This permit requirement has been met.

D.5. Provide training for municipal staff with respect to their assigned duties as it relates to sediment and erosion control from construction activity. One formal training course for inspection staff during their employment with the City and internal training on an as needed basis to maintain consistent reporting among all inspectors. On-Going All Years – Include in the annual report the number of staff and their sediment and erosion control training completed.

Through the PCWP Interlocal Agreement, the City of Omaha provides construction site inspection services for all grading permits. City of Omaha Environmental Inspectors who conduct inspections for sediment and erosion control must enroll and pass the Local Technical Assistance Program’s (LTAP) Erosion and Sediment Control for Installers and Inspectors. The training is a full-day course and includes a test at the end that if passed, the inspector becomes certified. This certification is valid for 5 years. When the certification expires, inspectors enroll for an online course to renew their certification. There are 15 certified inspectors in the City of Omaha’s Environmental Quality Control Division (EQCD). A summary of active City inspectors is provided in the table below.

First Name	Last Name	Certification ID#	Recertification Date
Christopher	Anderson	2101	9/6/2027
Heaven	Davis	3386	11/23/2027
Mark	Ermeling	1979	6/29/2026
Neil	Graybill	1333	2/17/2027
Eric	Grimshaw	1261	1/12/2027
Michael	Halbert	3266	7/14/2026
Jeremiah	Kobes	3385	10/24/2027
Shane	Lett	3264	6/15/2026
Charla	Long	1666	9/24/2024
David	Nusser	924	6/29/2026
Matthew	Nusser	1986	2/2/2027
Jennifer	Proescholdt	1987	4/28/2026
Jeffrey	Ryba	1353	6/23/2026
Carol	Sorensen	171	9/24/2024
Vern	Van Vleet	3393	12/7/2027

When construction takes place within the Village of Boys Town, Lamp Rynearson is engaged to perform routine site inspections to ensure compliance with local erosion and sediment control requirements. A summary of active Lamp Rynearson inspectors is provided in the table below.

Each inspector is a Certified Inspector of Sediment and Erosion Control. One inspector is a Certified Professional in Erosion and Sediment Control.

First Name	Last Name	CISEC Certification ID#	CPESC Certification ID#
Tom	Wells	0077	3422
Shawn	Traylor	2423	
Tyson	Smith	3111	
Jack	Buss	3100	

The Village of Boys Town staff and a consultant (Lamp Rynearson) perform storm water inlet/outlet inspections, Maintenance Facility inspections and developed a Facility Runoff Control Plan. Samples of those inspection templates and the Facility Runoff Control Plan provided in Attachment E.

In 2022, EQCD continued to incorporate sediment and erosion control training into the regular monthly safety toolbox meetings. Topics that are covered include review of inspection processes, enforcements, and open discussion to discuss current issues among staff. A summary of 2022 sediment and erosion control training is provided in the table below.

This permit requirement has been met.

D.6. Communicate with the regulated community and other groups affected by the Construction Site Runoff program and provide a mechanism to receive complaints from the public. On-Going All Years – Conduct workshops for developers, builders, site designers, contractors, and municipal staff as determined necessary. Track reports from the public regarding construction sites. Include the number of reports received in the annual report and the permittee’s response.

A Sediment and Erosion Control seminar was held February 10, 2022 with 424 attendees in-person and virtually. This annual seminar is intended to educate the regulated community. The seminar is hosted by the City of Omaha, P-MRNRD, Douglas County, and the PCWP. The seminar provided engineers, developers, and construction companies information on NPDES Phase II regulations, the PCWP’s grading permit program and sediment and erosion control BMPs.

The City of Omaha also holds multiple outreach events with the regulated community, including the events listed in the table below. Outreach materials are handed out at these events and participants are encouraged to visit OmahaStormwater.org for additional information and

resources. Phone calls, emails, and many other types of communications happen as part of regular job duties where City staff provide information and resources to support sediment and erosion control efforts in the community. See Attachment A for a full list of outreach events.

Date	Event Name	# of Attendees	Location	Details/Comments
2/3/2022	UNO Green Infrastructure Class	12	UNO Alwine Hall	Presentation about the City of Omaha Stormwater & CSO Programs & green infrastructure overall
2/10/2022	SEC Seminar	424	Scott Conference Center	Annual Sediment & Erosion Control Seminar; 210 in-person, 214 virtual
2/23/2022	Olsson stormwater compliance retreat presentation	8	Olsson Lincoln Office	
3/2/2022	UNL Urban Soils class lecture	12	Virtual to UNL Kiem Hall	Presentation on stormwater management, green infrastructure, & relationship with urban soils
3/22/2022	UNO Green Infrastructure Class	10	UNO Alwine Hall	Presentation about permeable pavement
4/21/2022	Kennedy Elementary 4-5th Grade "Keep it Clean" presentation	60		
4/21/2022	UNO Green Infrastructure Class	5	UNO Alwine Hall	Presentation about GI maintenance
5/23/2022	Karen Western Elementary	110	Karen Western Elementary	Watershed model activity shared with students; talk about science careers to 3rd - 5th graders
6/22/2022	Fontenelle School CSO Outreach Event	45	Fontenelle Park Pavillion	The Fontenelle summer program is having an event about stormwater and CSO. Grades 3rd, 4th, and 5th. We are thinking to do 3 stations with 15 kids each for about 8 minutes.

Date	Event Name	# of Attendees	Location	Details/Comments
10/5/2022	Conservation NE Webinar - Home green infrastructure	23	Virtual	Andy Szatko presented on stormwater management at home using green infrastructure
10/19/2022	Central High Engineering Club	22	Central High School	Chris Anderson presented on the value and variety of stormwater control measures

The Village of Boys Town received no reports from the public regarding construction sites. The Village of Boys Town receives comments at their dispatch center.

This permit requirement has been met.

E. Post-Construction Runoff Control

E.1. Continue to implement the Post Construction Program as stipulated in municipal code. Periodically update guidance material and develop divergent standards for difficult sites such as linear projects. Update as needed the Omaha Regional Stormwater Design Manual (ORSDM). Year 1 – Develop divergent standards for guidance document and update guidance as needed. Submit standards with the annual report. On-Going All Years – Revise as necessary. Include a summary of revisions in the annual report.

The City of Omaha’s guidance document for post-construction is titled *City of Omaha Post Construction Stormwater Management Planning Guidance* and was developed in July 2009 and updated in August 2015. This document is used by all PCWP communities. In 2019, the document was reviewed by the Omaha Post-Construction Engineer Reviewer as well as Reviewers in the Papillion Creek Watershed Partnership jurisdictions and the design community to solicit feedback on the document. Updates incorporated into the document as a result of this review includes the following:

- Example of a good drainage study report
- Certificate of Occupancy hold letter
- Post-Construction BMP inspection forms
- Updated text to clarify “no adverse impact”

The document is available on the City’s website OmahaStormwater.org and OmahaPermix.com. No divergent standards were developed. No changes were made to the manual in 2022.

This permit requirement has been met.

E.2. Review and update, if needed, the standards outlined in the municipal code and ORSDM for consistency with required performance standards as they relate to post-construction stormwater management plans. On-Going All Years – Report on any updates to the municipal code or ORSDM.

No updates were made to municipal code or ORSDM in 2022.

The Village of Boys Town made no recommendation for updates to municipal code or ORSDM.

This permit requirement has been met.

E.3. Maintain an online submittal and review process for site plans, easement and maintenance agreements, as built drawings, deed recordings, and drainage studies. On-Going All Years – Report number of PCSMP projects and the status of their progress in the annual report.

The Permix software is used for post construction stormwater plan submittals and review. Documents that are included in the PCSMP include a drainage study, proposed plan sheets, applicant certification, maintenance agreement, as-built drawings, BMP certification statement, certification cover sheet, and a certificate of occupancy letter (as-needed). Upon physical completion of the post-construction BMP(s), the PCSMP is recorded with the property deed to ensure long term compliance.

See Attachment F for a summary of PCSMP projects and their status.

The Village of Boys Town had no PCSMP projects in 2022.

This permit requirement has been met.

E.4. Develop SOPs for responding to complaints regarding Post Construction BMPs and a strategy for verifying BMPs are being installed & maintained in perpetuity. Year 1 – Submit SOPs with the annual report. On-Going All Years – Report on any complaints and/or BMPs which have been certified as complete.

A summary of BMPs that have been certified as complete is included in Attachment G.

Boys Town has developed a protocol for responding to complaints regarding Post Construction BMPs.

There were no Boys Town BMPs certified as complete in 2022.

This permit requirement has been met.

E.5. Maintain a database that stores information on approved PCSMPs. On-Going All Years – Provide an inventory of certified stormwater control measures installed as part of the PCSMP requirements. Include a count of BMP types as well as any known changes to BMPs in the annual report.

The Permix software used for post-construction stormwater plan submittal creates a database of BMPs installed as part of the PCSMP requirements. A summary of BMPs installed in 2022 is included in Attachment G.

This permit requirement has been met.

E.6. Inspect sites that are certified by the engineer of record and all sites identified as deficient on a complaint basis. Develop a protocol to bring sites into compliance. Year 1 – Develop protocol for compliance assistance and inspection strategy. On-Going All Years – Document and maintain inspection records of the certified PCSMP projects as identified in the strategy developed. Document any enforcement actions taken. Summarize activities in annual report.

A protocol for inspection of BMPs that are certified by the engineer of record and compliance assistance has been developed.

There are no PCSMP projects within the Village of Boys Town.

This permit requirement has been met.

F. Pollution Prevention/Good Housekeeping for Municipal Operations

F.1. Maintain an inventory and map of municipal facilities. Review annually and update if needed. On-Going All Years – Maintain an inventory and map of all municipal facilities.

The Village of Boys Town and Lamp Rynearson maintain an inventory and map of municipal facilities. Each organization has a separate system for mapping and maintenance of data. An effort was made in 2022 to ensure each entity's data has been shared and is duplicated in each system.

This permit requirement has been met.

F.2. Conduct assessments of municipal maintenance facilities and review their municipal; runoff control plans as applicable. Revise plans as needed if facilities expand or reduce activities and implement recommendations based on annual inspections. Year 1 – Develop a strategy to assess municipal facilities and prioritize them based upon a defined set of criteria, include strategy in the annual report. Years 2-5 – Track the number of assessments for municipal facilities based upon the strategy developed in year 1. Include the number of assessments

completed, a description of the assessment procedure and any changes in facilities ranking in the annual report.

The Village of Boys Town developed a strategy to assess municipal facilities in late 2022. In Permit Year 4 (June 2021-June 2022) (0) assessments were completed. Assessments will begin in the spring of 2023. The Village of Boys Town staff and a consultant (Lamp Rynearson) will perform storm water inlet/outlet inspections and Maintenance Facility inspections. Samples of the inspection templates and the Facility Runoff Control Plan are shown in Attachment E.

This permit requirement has been met.

F.3. Continue to implement Good Housekeeping Program for municipal facilities that addresses “high priority” facilities and site-specific SOPs. On-Going All Years – Annually report new, removed, or significantly updated municipal facilities.

There were no significantly update changes to the Village of Boys Town municipal facilities in 2022. The Village of Boys Town continues to update the storm sewer database with any new systems, removed or updated facilities.

This permit requirement has been met.

F.4. Implement practices for maintaining the storm sewer system that includes catch basin maintenance, open channels and other drainage structures, street sweeping, and structural stormwater controls. All maintenance procedures are to be performed such that wastewater and waste materials do no enter the MS4. Year 1 – Provide a description of the maintenance programs in the annual report. On-Going All Years – Annually report on Sewer Maintenance activities related to maintain the storm sewer system and changes to any of the maintenance practices.

Street sweeping is completed each year in March. The Village of Boys Town evaluates and maintains storm sewer infrastructure, and retention ponds throughout the year. In 2022 maintenance was performed at the outlet structures of the lake and at the outfall discharge.

This permit requirement has been met.

F.5. Provide training for municipal employees in pollution prevention and good housekeeping. Year 1 – Develop a strategy for municipal employee training in pollution prevention and good housekeeping, include strategy in annual report. On-Going All Years – Conduct training events for municipal staff. Include number of employees trained, based on strategy developed in year 1, in annual report.

During Permit Year 4 (June 2021-June 2022) Boys Town completed the following training activities per the training strategy:

Grounds review of toxins, waste and contaminant restrictions – waste water.

On September 27, 2022 Village of Boys Town staff and representatives from Lamp Rynearson met with NDEE Charlie deShazer and Randol Wehrbein. Following that meeting, five Village of Boys Town staff were involved in further development of the SWMP for the Village of Boys Town.

This permit requirement has been met.

F.6. Provide educational material to contractors hired to perform maintenance activities on the MS4. Year 1 – Develop materials to provide to contractors and include in the annual report. Years 2-5 – Include in the annual report any new materials or updates to existing materials.

Evaluation documents for Facility Runoff Control Plans (FRCP) have been developed and templates shared with the members of the PCWP. These templates include a photo checklist, site questionnaire, facility profile sheet, hot spot checklist, photo log and a facility recommended BMP checklist. FRCPs are developed for each facility in the PCWP communities.

The Village of Boys Town has developed Facilities Runoff Control Plans (FRCP) for the Boys Town Maintenance Facility and has been included in Attachment E.

This permit requirement has been met.

5. Fiscal Expenditures

In 2022 a significant effort was undertaken to maintain compliance with MS4 requirements. Although no financial metrics were tracked for the efforts of staff, Lamp Rynearson was engaged to perform consulting services. ME Collins was engaged to perform maintenance on facilities. Costs associated with these efforts are approximately \$55,000.

6. Changes in MS4 Area

Boys Town is a small MS4 permittee under the MS4 general permit #NER220000. The program area is located within section 24, township 15 north, range 11 east. The program boundaries are South of West Dodge Road, West of 132nd Street, North of Pacific Street and East of 144th Street. Boys Town is bordered by the City of Omaha on all sides. The entire MS4 program area is owned and operated by the Village of Boys Town. No changes to the MS4 area were made in 2022

CAREER CENTER INSPECTION REPORT

A Indoor Collection System:				
1	Do indoor floor drains, trench drains, or oil/water separators need to be cleaned out or repaired?	Yes	No	NA
B Paved Surfaces:				
2	Do paved surfaces need to be swept to prevent stormwater from carrying loose debris or materials to storm drain systems?	Yes	No	NA
C Outdoor Storage:				
3	Are there any leaks, spills or fluid residues from parked vehicles or equipment?	Yes	No	NA
4	Are leaking vehicles parked near storm drains, inlets, catch basins, known ponding areas or drainage ditches?	Yes	No	NA
5	Is there damage or leaks to equipment lines or connectors?	Yes	No	NA
D Washing:				
6	Do wash areas have accumulated gravel, salt, grass clippings or other materials that need to be cleaned up?	Yes	No	NA
E Fueling:				
7	Does the area where fueling occurs show evidence of staining from fuel or vehicle fluids?	Yes	No	NA
8	Are hoses and nozzles showing signs of wear, cracks, or damage?	Yes	No	NA
F Other Products:				
9	Are containers located in traffic areas or near drains or is there evidence of leaks, spills, damaged or unlabeled product containers for paint, adhesives, solvents, petroleum oils and fluids, pesticides/fertilizers or other products.	Yes	No	NA
G Bulk Storage Tanks:				
10	Have stored materials/residues accumulated on the ground surface near the storage tank areas?	Yes	No	NA
11	Are there signs of leaks, corrosion, support or foundation failure, or other deterioration on tanks, pumps, pipes or	Yes	No	NA

	valves?			
12	Do storage tanks need to be protected from traffic by location or barriers?	Yes	No	NA
H	Waste Materials:			
13	Has trash, litter or debris accumulated along the boundary of the facility?	Yes	No	NA
14	Is there evidence of leaks, spills, damaged or unlabeled waste containers?	Yes	No	NA
15	Do storage tanks need to be protected from traffic by location or barriers?	Yes	No	NA
16	Can the amount of waste materials or recyclables be reduced to minimize exposure? (Especially the grease bin & trash compactor areas)	Yes	No	NA

Overview of Facility Operations

INTRODUCTION

This facility is utilized by Street Maintenance and Vehicle Maintenance for the purpose of storing, staging and maintaining vehicles, equipment and materials necessary for their operations. Street Maintenance operations include street cleaning, repair, winter salt and sand application, sign maintenance, as well as litter, debris and graffiti cleanup. Vehicle Maintenance provides repair and routine maintenance activities for equipment and vehicles used by various departments throughout Boys Town.

FACILITY RUNOFF CONTROL PLAN INFORMATION

This Facility Runoff Control Plan (FRCP) supports Boys Town stormwater management program. The document provides education, inspection, and corrective action guidance for the Maintenance Facility to help implement the Good Housekeeping/Pollution Prevention Measures required of Boys Town. Facility staff can use the site-specific information provided in this document to:

- Conduct inspections required by the Boys Town,
- Identify potential target pollutants and sources, and
- Take personal actions for managing pollutants and sources.

Facility Good Housekeeping/Pollution Prevention **inspections will be conducted** by Qualified Facility Inspectors **each month at approximately 30 day intervals** using the form provided in this FRCP. A Facility Inspector is considered qualified at the discretion of the FRCP Development Team. At a minimum, a Qualified Facility Inspector will have read this FRCP; be familiar with, if applicable, the Spill Prevention, Control, and Countermeasure (SPCC) Plan; receive a briefing from a Qualified Facility Inspector on the inspection process; and participate in Stormwater Pollution Prevention Training when offered by Boys Town. The following personnel will be involved in managing and conducting the monthly inspections as well as participating in random Audit Inspections scheduled by the FRCP Development Team:

Department Supervisor

Main Site Contact

Alternate Contact

Alternate Contact _____

Qualified Facility Inspectors:

1. _____

5. _____

2. _____

6. _____

3. _____

7. _____

4. _____

8. _____

A FRCP Monthly Inspection form must be completed as part of every 30 day inspection. When problems are identified during an inspection, the last page of the form will be used to note corrective actions that can be done to quickly reduce risk that the problem poses. Personal actions (sometimes called non-structural best management practices) are encouraged as the first line of defense against stormwater pollution. If structural best management practices, which typically require capital expenditures, are necessary, the inspection forms can be used as a demonstration of such a need. Corrective actions must be clear, descriptive, and specific. Write corrective actions in such a way that anyone can understand exactly what needs to be done and where it needs to be done.

Problems identified on the monthly inspection form should be addressed or resolved before the next rain event and no later than the next inspection. Mark the date that each corrective action was taken and attach a more detailed description of the problems to the form if necessary. Completed inspection forms will be kept at the facility for at least three years.

Qualified inspectors may encounter difficult or complex issues that will take longer than a month to resolve. It is important that the inspectors and the facility supervisor work together to identify a corrective action that can be accomplished before the next inspection takes place. Some possible examples of intermediate steps may include:

- Research alternative products available, costs and possible distributors
- Order new part or product through purchasing
- Contact Main Site Contact, Alternate Contact, Supervisor, or Boys Town to discuss priorities and available funding for alternative management practices.

If a corrective action is not completed by the end of the month, it must be moved over to the next inspection report. Place an asterisk (*) in the Date Implemented box and move the incomplete corrective action to the next month's form. Carry the incomplete corrective action month to month until is completed and dated.

Potential Pollutant Sources and BMPs

OVERVIEW

Target pollutants enter the environment through the day-to-day operation and maintenance activities conducted within maintenance facilities. The following five groups of target pollution categories include a range of pollution sources that can be managed to reduce the risk of stormwater pollution by minimizing the exposure of target pollutants to the environment.

A. BUILDING AND GROUNDS MANAGEMENT

Maintenance facilities require building and grounds management, which includes care of landscaped areas around each facility, cleaning of parking areas and pavements, and maintenance of the stormwater drainage system and some structural Best Management Practices (BMPs).

Tasks to perform these activities include equipment operation, litter/trash pickup and maintenance landscaping, which can in turn result in spills, leaks, trash, sewage, chemical vegetation control, and erosion.

Potential target pollutants could include sediment, litter, trash, sewage, pesticides, fuel, hydraulic fluid and oil. **Buildings and grounds must be maintained in a manner that reduces the risk of discharging pollutants to the stormwater drainage system.**

The following potential pollution sources and/or potential pollutant conveyances are included in the FRCP:

Stormwater Drainages- drain inlets, catch basins, drainage swales, ditches, outfalls

Infiltration, Retention and Detention BMPs Paved

Areas

Exposed Soil, Gravel and Millings

Floor Drains, Trench Drains, and Oil-Water Separators

A. BUILDING AND GROUNDS MANAGEMENT cont.

Suggested Best Management Practices (BMPs):

- a. Keep culverts, ditches, gutters, drain inlets, catch basins, and outfalls as well as infiltration, retention and detention areas free of target pollutants and in good structural condition.
- b. Sweep paved areas to remove sediment and other materials that could be tracked or dispersed across the facility. Do not wash or spray materials into the storm drain system.
- c. Inspect and identify areas of erosion, or off-site discharge of sediment or aggregate, that need preventative maintenance.
- d. Keep floor drains, trench drains, and oil-water separators clear of build-up or debris to ensure proper drainage.
- e. Clearly mark storm drain inlets with a message (paint, stamp, adhesive discs, etc.) to protect location from target pollutants.
- f. Keep emergency clean-up materials such as drain covers, absorbent booms, rags, or sandbags conveniently located near drain inlets, catch basins and outfalls to stop pollutants from entering in the event of a spill.
- g. Install grates over inlets that will keep trash and debris from entering storm drains.
- h. Keep paved surfaces in good condition. Protect slopes, flat areas, exposed soil areas, or transportation corridors with pavement if vegetation or aggregate are not an option or are inadequate solutions.

B. VEHICLE AND EQUIPMENT MANAGEMENT

Municipal maintenance facilities are regional staging areas for all vehicles and equipment used to operate and maintain streets, parks, trails, sewers, fleets, waste collection and other properties owned by Boys Town. All vehicles and equipment require operation and management of some type, which may include storage, fueling, cleaning, maintenance, and repair.

Poor management practices can quickly lead to substantial spills, leaks, and non-stormwater discharges. **Vehicle fluids at fueling areas as well as equipment washing, storage, and maintenance areas must be managed to reduce the risk of discharging pollutants to the stormwater drainage system.**

The following potential pollution sources are included in the FRCP:

Vehicle & Equipment Washing Parked

**Vehicle & Equipment Storage Vehicle &
Equipment Fueling**

Vehicle & Equipment Maintenance and Repair

B. VEHICLE AND EQUIPMENT MANAGEMENT cont.

Suggested Best Management Practices (BMPs):

- c. Wash vehicles in designated areas (preferably under cover with a pipe to a collection pit and the sanitary sewer) away from storm drain inlets, catch basins, outfalls, and areas that are prone to flooding or ponding.
- d. Minimize water use during cleaning operations and use dry clean-up methods to remove sediments, clippings and debris.
- e. Use phosphate-free biodegradable detergents if cleaning agents are necessary.
- f. Keep parts, equipment, and vehicles stored indoors or within designated outdoor areas away from storm drains, inlets, or catch basins.
- g. Inspect all connectors and liquid reservoirs on stored equipment and vehicles for leaks. Move leaking equipment and vehicles indoors or capture leaking materials and dispose of properly
- h. Immediately contain and clean up any spills or releases when they occur, and properly dispose of the cleaning materials.
- i. Cleanup evidences of fuel or oil residues on surfaces by grinding absorbent into the surface (typically using the sole or heel of your shoe or boot) and sweeping up material.
- j. Keep spill response kits and/or clean-up materials in close proximity to areas where spills or leaks are most likely to occur. Dispose of properly after use.
- k. Park vehicles and/or equipment close to the pump when refueling.
- l. Conduct all maintenance on vehicles and equipment indoors whenever possible. Do not repair or maintain vehicles and equipment near drain inlets, catch basins, or outfalls.

C. PRODUCT MATERIAL MANAGEMENT

Maintenance facilities store a large variety of liquid and soluble products that could be harmful to the environment if they come into contact with surface waters. Materials that may be stored include pesticides, petroleum products, paints, concrete and asphalt products, solvents and others. Storage and handling practices that minimize exposure of these materials to stormwater significantly minimize the potential for pollution of receiving water.

Large stockpiles of materials located on maintenance lots require responsible management just as much as products that are stored indoors or under cover. Large stockpiles of material may include sand or gravel mixed with de-icing chemical such as salt, magnesium chloride, etc.; asphalt cold patch material; mulch; soil; or millings. Stockpiles of material containing chlorides or other potential pollutants should be covered to prevent leaching between April 15th and October 1st in all cases and year-round when practical. **All product materials must be managed to reduce the risk of discharging pollutants to the stormwater drainage system.**

The following potential pollution sources are included in the FRCP:

Stockpiled Materials- sand or gravel mixed with de-icing chemical, asphalt cold patch, mulch, millings, soil

Weed & Pest Management Chemicals- fertilizers, herbicides, pesticides

Paints, Adhesives, & Solvents

Petroleum, Oils, & Fluids

C. PRODUCT MATERIAL MANAGEMENT cont.

Suggested Best Management Practices (BMPs):

- a. Locate raw material stockpiles away from drain inlets, catch basins, and outfalls.
- b. Sweep up loose product that is outside of designated area to prevent tracking.
- c. Reduce the exposure of stockpiles and limit the amount of stockpiled materials during the rainy season.
- d. To the extent possible, store materials indoors or cover piles with storm resistant coverings to prevent exposure to precipitation.
- e. Minimize the amount of pesticides and fertilizers that are stored on-site at all times.
- f. Store and dispose of pesticides and fertilizers per manufacturer's instructions and any state requirements.
- g. Store materials in a dedicated area away from direct traffic routes to prevent accidental damage or spills and store materials indoors or under a covered area when possible.
- h. When receiving new product materials, check drums, tanks, and containers for leaks.
- i. Ensure all containers are clearly and accurately labeled according to contents.
- j. Close containers between filling and emptying events.
- k. Keep an adequate supply of dry absorbent material and spill response kits on-site and dispose of properly once used.

D. BULK STORAGE TANK MANAGEMENT

Bulk storage tanks full of stock products are a typical feature of many maintenance facilities and they generally come in all shapes and sizes. Substances contained in storage tanks may include soil stabilizers, dust suppressants, herbicides, fertilizers, de-icing chemicals, fuels, lubricants and other petroleum products.

A Spill Prevention, Control, and Countermeasure (SPCC) Plan may be in place to reduce the risk of pollution from certain petroleum products, but all bulk storage tanks generate a certain level of risk of discharging pollutants to adjacent drainages and receiving waters. **Storage tanks must be protected and maintained in a manner that reduces the risk of discharging pollutants to the stormwater drainage system.**

The following potential pollution sources are included in the FRCP:

Aboveground Storage Tanks – fuel, winter road maintenance chemicals, and road, motor, or tack oils

Underground Storage Tanks – fuel

D. BULK STORAGE TANK MANAGEMENT cont.

Suggested Best Management Practices (BMPs):

- a. Inspect storage tanks, pumps, pipes, and valves for leaks, signs of corrosion, support or foundation failure, or other deterioration.
- b. Keep valves or plugs on secondary containment closed at all times except when containment water that is free from visual evidence of pollution is being removed (see SPCC requirements, if applicable). Collected water can be discharged after any evidence of pollution has been removed. Immediately replace plug or close valve once water is drained.
- c. Protect tanks from traffic using bulkheads, jersey barriers, or other substantial barriers.
- d. Educate tank fillers to use wheel blocks during unloading and where the overfill warning devices and alarms are located.
- e. When possible, locate aboveground storage tanks on paved, impermeable surfaces with secondary containment.
- f. Inspect surfaces near storage tanks for visible signs of residues. Cleanup fuel or oil residues on surfaces by grinding absorbent into the surface and sweeping up material.
- g. Maintain and inspect integrity of all underground storage tanks as per state fire marshal requirements.
- h. Periodically check to make sure the ball float valve is functioning properly and that it will restrict fuel flow according to manufacturer's specifications.
- i. Make sure automatic shutoff devices for all tanks are functioning properly.

E. WASTE MATERIALS MANAGEMENT

Activities at maintenance facilities generate many types of wastes that accumulate or may be discharged into the environment. Types of waste that must be managed include construction salvage materials such as rubble, fencing, soil, aggregate; recyclables such as scrap metal, tires, spent parts-washer solvent, used oil, and used batteries. Waste materials can also include trash and debris, empty product containers, and rinse water.

Personnel should reference Boys Town procedures to determine the appropriate methods for managing all types of waste since federal and state waste management regulations require specific disposal practices. For any material that poses a significant threat to human health and the environment, contact Hazardous Materials Response. If unsure of disposal requirements, contact Environmental Services for direction. **Both hazardous and non-hazardous wastes must be managed to reduce the risk of discharging pollutants to the stormwater drainage system.**

The following potential pollution sources are included in the FRCP:

Waste Materials- trash, debris, street sweepings, vacuum truck waste, empty product containers, rinse water, used oil filters

Construction Salvage- rubble, fencing, replaced equipment, soil, aggregate

Recyclables- scrap metal, used batteries, tires, spent solvent, used oil

E. WASTE MATERIALS MANAGEMENT cont.

Suggested Best Management Practices (BMPs):

- a. Cover and clearly label all waste receptacles according to waste type.
- b. Collect all litter that accumulates around the facility grounds and dispose in properly labeled containers.
- c. Ensure that trash bins are used and not overflowing by scheduling regular pick-up and disposal of waste materials.
- d. Store containers, material, and salvage away from direct traffic routes, drain inlets, catch basins, outfalls, areas prone to flooding or ponding, and floor and trench drains to prevent accidental damage or spills.
- e. Educate and train every employee that it is their daily responsibility to be aware of materials, residues, and trash that could be washed away in stormwater.
- f. Develop a plan to reuse or dispose of irregular waste material as soon as the material is brought on-site.
- g. Store batteries in an upright position in leak-proof covered containers.
- h. Schedule regular pick-up for waste tires, scrap metal, used oil, used antifreeze and other waste intended for recycling.
- i. If any waste material may be hazardous, complete a waste determination prior to disposal according to Boys Town procedures and keep records at the facility. For any material that poses a significant threat to human health and the environment, contact the local Hazardous Materials Response team. If unsure of disposal requirements, contact the Environmental Services division for direction.
- j. Store hazardous waste containers (preferably in a covered area) on pallets or in containment devices to prevent corrosion of the containers by contact with moisture or other chemicals.
- k. Immediately contain and clean up any spills that may occur, and properly dispose of the cleaning material.

STATE OF NEBRASKA

DEPARTMENT OF AGRICULTURE

Steve Wellman

Director

February 10, 2021

STEPHANIE S JOHNSON
18437 POPPLETON CIR
OMAHA, NE 68130

Pete Ricketts
Governor

Dear Card Holder:

Enclosed is your current pesticide applicator license card. Please review the information printed on the card to verify that it is correct. If the card is correct, peel the card from this letter and fold the card so all of the printed information shows on the front and back and sign the card in the white strip provided. If there are any errors in the information on the card, please notify the Nebraska Department of Agriculture (NDA) immediately at (402) 471-2351.

Be sure to carry your license with you when applying pesticides. Always present your pesticide applicator license card to your pesticide dealer when purchasing restricted-use pesticides (RUPs). Your dealer is required to verify that you hold a valid license to purchase pesticides appropriate to the type of license and category shown on your license. Your dealer will be giving extra attention to this responsibility, and your signature, for Homeland Security reasons.

For additional information regarding the NDA pesticide program, use the following web address at www.nda.nebraska.gov/pesticide.

To search the NDA list of Currently Registered Pesticides; Licensed Dealers of RUPs; or Licensed Pesticide Applicators, use the following web address at www.kellysolutions.com/ne.

If you have any questions regarding your license, please feel free to call the Nebraska Department of Agriculture at (402) 471-2351.

Sincerely,
DEPARTMENT OF AGRICULTURE

Tim Creger, Pesticide Program Manager
Animal and Plant Health Protection

Nebraska Department of Agriculture
Pesticide Applicator License

The person named on this card is licensed to purchase and use restricted use pesticides. Categories apply only to commercial and noncommercial applicators.

BOYSTOWN
SANITARY SEWER OVERFLOW
REPORTING PROCEDURE

A sanitary sewer overflow (SSO) occurs when wastewater from a sanitary sewer system overflows the system and discharges to the environment. This can occur due to a blockage in the system, extraordinary high flows, line breaks or other reasons. SSOs are often associated with wet weather events but can occur during dry weather as well. An SSO often occurs at a sanitary manhole, but could be observed in other locations due to a line break.

Procedures for Reporting an SSO:

The Boys Town staff should be educated on identifying an SSO and the procedures to follow if an SSO is observed and/or reported. Boys Town will designate a representative and a back-up representative that will be responsible for taking reports of SSOs. The Boys Town representatives shall be familiar with the Nebraska Department of Environment and Energy (NDEE) "NPDES & NPP Non-Compliance Report Form – Sanitary Sewer Overflow Report"

1. If an SSO is observed by Boys Town staff or a member of the Public, they should immediately contact Boys Town Dispatch (531-355-1155) as soon as possible.
2. Boys Town Dispatch shall note the time and date of the report and shall notify the Boys Town representative, Brian Sutter, Director Facilities Maintenance and Operations (402-660-1952). The backup contact will be Jay Powers, Director Facilities Projects (402-214-8614).
3. The Boys Town representative will ensure a Boys Town employee visits the location of the overflow immediately.
4. After confirmation that an SSO is occurring, the Boys Town representative shall notify the Nebraska Department of Environment and Energy (NDEE) within 24 hours of the occurrence and provide verbal responses to the NPDES & NPP Non-Compliance Report (402-471-2186).
5. The Boys Town representative shall take measures to protect the public from the SSO.
6. The Boys Town representative shall document the location of the overflow occurrence and manhole (if SSO is occurring from a manhole).
7. The Boys Town representative shall note the receiving water of the SSO. This could be a body of water, creek, or a storm sewer inlet.
8. The Boys Town representative shall take video of the SSO occurring and if possible, estimate the volume of SSO flow occurring in gallons per minute (GPM).
9. The Boys Town representative shall notify Joe Oetken at Lamp Rynearson (402-510-7669).
10. The Lamp Rynearson representative shall assist the Boys Town representative in obtaining a sample of the overflow wastewater for testing in accordance with the NDEE Sanitary Sewer Overflow Report.
11. The Lamp Rynearson representative shall assist the Boys Town representative in contacting a contractor or plumber to help identify the source of the problem and to provide a correction.

12. The Boys Town representative with assistance from the Lamp Rynearson representative shall complete the Sanitary Sewer Overflow report and send to it to the NDEE within 5-days of the occurrence.

Attachment C - Summary of Changes to Grading Permit Terms & Conditions

**THE PApILLION CREEK
WATERSHED PARTNERSHIP (PCWP)**
<http://www.omahapermix.com>

PCWP Grading Permit Update

The PCWP Grading Permit Terms and Conditions have been updated to be consistent with the Nebraska Department of Environment and Energy (NDEE) Construction Stormwater (CSW) Permit NER910000 issued December 1st, 2021. For more information about the NDEE CSW Permit, please visit <http://deq.ne.gov/Publications/pages/WAT012>. The updated Grading Permit Terms and Conditions will become effective November 14th, 2022.

The PCWP Grading Permit is largely unchanged from the previous version, but the following list is a summary of updates made to be consistent with NDEE's CSW NER910000.

- Inspection frequencies, excluding nonbusiness hours, for Stages 1-3 and Winter have been updated to the following:
 - Stage 1 sites will be weekly Site Inspections with no more than 7 calendar days between Site Inspections. No rain event inspection.
 - Stage 2 will be every other week (14 days) Site Inspections and within 24 hours of a storm event equal to or greater than 0.25 inches
 - Stage 3 will be monthly Site Inspections and within 24 hours of a storm event equal to or greater than 0.25 inches
 - Winter Stage will be monthly Site Inspections and within 24 hours of a storm event equal to or greater than 0.25 inches. Winter Stage remains for approved sites from December 1st to March 1st.
 - See pages 12-15 of the PCWP Grading Permit Terms and Conditions.
 - **To update a project's inspection frequency**, the Narrative must be updated to note the new inspection frequency and uploaded to Permixon under the file type "SWPPP Narrative – MODIFICATION".

- Final Stabilization definition has been updated to the following:
 - a. All soil disturbing construction activity has been completed;
 - b. A uniform perennial vegetative cover with a minimum density of 70 percent of the native background vegetative cover, has been established on all non-impervious surfaces and areas not covered by permanent structures unless equivalent permanent stabilization (such as riprap, gabions, and geotextiles) measures have been employed;
 - c. All permanent drainages, constructed to drain water from the site, has been stabilized to prevent erosion;

- d. All temporary erosion protection and sediment control BMPs have been removed without compromising the permanent erosion protection and sediment control BMPs;
 - e. All sediment build-up has been removed from conveyances and basins that are to be used as permanent water quality management BMPs. The cleanout of permanent basins used as temporary BMPs during construction shall be sufficient to return the basin to design capacity;
 - f. Responsibility for long-term maintenance of permanent BMPs have been assigned;
 - g. Construction activity conducted on or through agricultural or silvicultural land shall be considered finally stabilized upon return to the preexisting agriculture or silviculture use; and
 - h. Construction activity conducted at new or industrial facilities that will operate the site in an exposed manner (such as limestone mining and solid waste landfills) shall be considered finally stabilized upon commencement of industrial activity consistent with the industrial use and coverage under the appropriate NPDES permit for industrial storm water.
 - i. All documents required for the Post Construction Stormwater Management Plan (PCSMP) have been submitted and approved including, but not limited to, the BMP Maintenance Certification, Maintenance and Easement Agreement, and As-Built Plans. (Only for projects where the PCSMP is applicable)
- Ongoing Permitted Projects
 - No new application is required when the Grading Permit Terms and Conditions are updated. The SWPPP must be updated to meet the current Grading Permit Terms and Conditions when a Grading Permit Modification is made. When a new NDEE Construction Stormwater (CSW) Permit is issued, the new NOI and Authorization Letter, if applicable, must be submitted to Permixon when received.

The PCWP Grading Permit associated documents such as the SWPPP Site Map Preparation Guide have also been updated to capture minor updates such as changing NDEQ to NDEE. The SWPPP Narrative Template has also been updated to clarify certain sections and provide some additional space for responses.

Please review the updated Grading Permit Terms and Conditions and begin utilizing the updated documents as needed going forward. If there are any questions or comments, please contact Andy Szatko at 402-444-5213 or Andy.Szatko@cityofomaha.org.

Stormwater Pollution Prevention Begins With YOU!

Do not blow leaves and grass clippings into the streets or stormwater inlets

Use drip pans for leaky vehicles and equipment. Keep up with all scheduled maintenance

Apply all chemicals according to labels. Avoid spraying near inlets

Use dry clean up methods for oil and other spills. Dispose of cleaning materials accordingly

Keep the lid on all containers when not in use and are properly labeled

Properly store and maintain stockpiles in a safe, designated area

Keep the exterior of containers clean

Wash vehicles and equipment inside where water can be captured and treated

Pick up all trash and debris, including cigarette butts

Do not pour anything down a storm drain, even if it is labeled "Environmentally Friendly"

Remember, Only Rain Down The Storm Drain!
